LEHIGH BAJA

Help build CC11.

Sponsorship guide

2026/2027

Engineering beyond the classroom.

Lehigh Baja is a student-run team that designs, builds and races a new single-seat off-road vehicle each year.

Baja SAE takes engineering beyond the classroom: students turn designs into working systems, test them under pressure and solve problems together. Our members come from across majors and take on the work without course credit.

2026 competition recap

RECENT RESULTS & LESSONS

Baja SAE New York

JUNE 11-14, 2026 / PALMYRA, NY

CC10 / 2026 COMPETITION

CC10 cleared tech in two attempts and entered acceleration, hill climb, suspension & traction, and endurance against 101 other teams.

A first-lap rollover damaged the gearbox. Repairs put the car back on course for four laps with three drivers before further damage ended the run.

Chassis + suspension stayed structurally intact.

OktoBajaFest 2026

OCTOBER 2-4, 2026 / SEVEN SPRINGS

THE EVENT / THE PADDOCK / THE TEAM

INSPECTION & DYNAMIC EVENTS

Clean safety inspections on day one opened every dynamic event. The car completed hill climb without issue and cleared several Baja Cross obstacles.

An impact snapped the axle. We welded it and resumed endurance, but it snapped again late in the race after CC10 rolled onto its side. The longer run exposed the axle design's vulnerability and provided data to prioritize durability in CC11.

Engineering CC11

For 2026-2027, we are designing and building CC11 around three technical goals and lessons from CC10.

01 More front suspension travel

Increase front suspension travel to better tackle obstacles and jumps. Greater travel gives the suspension more range to absorb changes in terrain.

02 More room for the driver

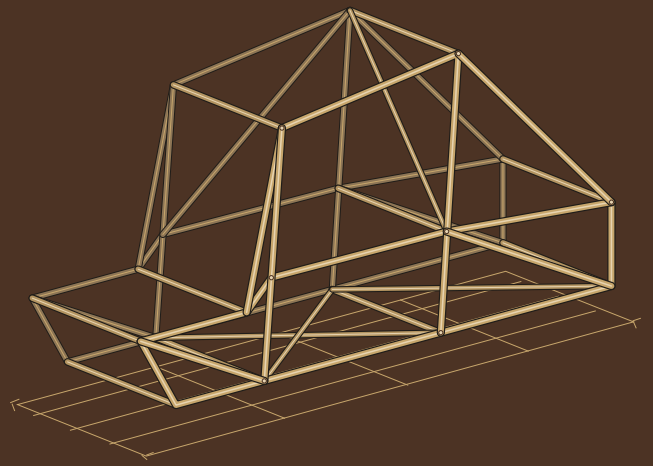

Increase space in the car's toe box to improve steering radius and allow taller students to drive CC11.

03 Our first student-built gearbox

Implement a forward/reverse gearbox designed and manufactured by students for the first time.

FROM COMPETITION TO DESIGN

CHASSIS CONCEPT / ILLUSTRATIVE GEOMETRY

DURABILITY INFORMED BY DATA

CC10's longer endurance run exposed an axle design weakness and gave us valuable data. Those lessons will make durability a key focus in CC11's design.

From raw material to the starting line.

$20,000

2026-2027 FUNDRAISING TARGET

Outside donors provide the majority of our funding. Your support helps students turn the next design into a car we can build, test and race.

Build a relationship with students who design, make and solve problems hands-on.

01

Design + manufacture

Materials, parts and fabrication turn student designs into working systems.

02

Test + improve

Tools and facility access help the team validate ideas and refine the car.

03

Transport + compete

Travel, competition registration and tires help get the team to the starting line.

Sponsorship levels

Cash and agreed-value in-kind support qualify for the same tiers.

SPONSORSHIP LEVEL	Bronze	Silver	Gold	Mountain Hawk
Annual pledge	**$100+**	**$500+**	**$1,000+**	**$1,500+**
Recognition + promotion Website and brochure recognition; social media promotion; certificate of donation.	✓	✓	✓	✓
Your brand on the car Website and 2027 body-panel logo; team apparel recognition; team photo for publicity.	–	✓	✓	✓
Recruitment + team access 2027 firewall logo; team and resume access for recruitment; on-campus recruitment support.	–	–	✓	✓
Events + outreach Invitations to testing and outreach events; access to the team and car for outreach.	–	–	–	✓

Each tier includes the benefits of all lower tiers. Your contribution qualifies at the highest level reached.

More ways to build CC11.

Parts, services and facility access can be just as valuable as funding.

VALUING YOUR CONTRIBUTION

We agree on the value of your in-kind contribution, then apply that value to the sponsorship levels on the previous page.

01

Tell us what you can offer

Share the parts, services or facilities available and your expected timing.

02

Confirm the fit and value

Together, we confirm what the team can use, agree its value and identify your tier.

03

Coordinate the contribution

Arrange delivery or access, then confirm the recognition included at your level.
